LMVR Quickstart Guide

1. To begin recording, move the switch on the bottom to the “ON” position. The LED will be solid blue and red to indicate it is powering on, then the LED will blink red and go out to indicate the unit has started recording.

---

2. To stop recording, move the switch on the bottom to the “OFF” position. The LED will blink blue and red and then go out to indicate the recording has stopped and saved.

Tips & Other Info

- To access recordings, make sure the switch is in the “OFF” position.

- The LED light will be red while charging, and blue once fully charged.

- The LED light will flash red 10 times when the battery is low.

- To change the date/time stamp, open the “MRECSET.TXT” file and replace the text to match the current date/time and then save the file and turn the unit on to update the device (ex: 13:01 2024/8/21 in the text file would update the date/time to August 21st, 2024, 1:01 PM).
